Remote Sensing for Archaeological Heritage Management
Edited by David C Cowley

Remote sensing is one of the main foundations of archaeological data, underpinning knowledge and understanding of the historic environment. The volume, arising from a symposium organised by the Europae Archaeologiae Consilium (EAC) and the Aerial Archaeology Research Group (AARG), provides up to date expert statements on the methodologies, achievements and potential of remote sensing with a particular focus on archaeological heritage management. Well-established approaches and techniques are set alongside new technologies and data-sources, with discussion covering relative merits and applicability, and the need for integrated approaches to understanding and managing the landscape. Discussions cover aerial photography, both modern and historic, LiDAR, satellite imagery, multi- and hyper-spectral data, sonar and geophysical survey, addressing both terrestrial and maritime contexts. Case studies drawn from the contrasting landscapes of Europe illustrate best practice and innovative projects.

Language: English with abstracts in French and German
Publication date: 2011
Distribution: Archaeolingua, Budapest
Format: 297 × 210mm, hardback
Extent: 312 pp + 218 illustrations in full colour throughout
ISBN: 978-963-9911-20-8
Price: € 40 + packing and shipping

Copies of the book can be ordered from:
Archaeolingua, H-1014 Budapest, Úri utca 49, Hungary
tel/fax: +36 1 3758939
email: kovacsr@archaeolingua.hu
web: www.archaeolingua.hu/books/eac.html

Payments can be made by credit card (VISA or Mastercard), cheque (in euro) or by bank transfer.

## Contents

Acknowledgments

Opening address
*Katrin Jakobsdottir, Minister of Education, Science and Culture, Iceland*

Foreword
*Katalin Wollak, President of Europae Archaeologiae Consilium*

Acknowledgments

1. Introduction: remote sensing for European archaeological heritage management
*Dave Cowley and Kristin Huld Sigurdardottir*

### Making remote sensing work for archaeological heritage management

2. Identifying the unimaginable – Managing the unmanageable
*Dominic Powlesland*

3. ‘Total Archaeology’ to reduce the need for Rescue Archaeology: The BREBEMI Project (Italy)
*Stefano Campana*

4. Remote sensing for European archaeology and heritage management – site discovery, interpretation and registration
*Dave Cowley*

### New environments, platforms and technologies: challenges and potential

5. Airborne Laser Scanning in forested areas – potential and limitations of an archaeological prospection technique
*Michael Doneus and Christian Briese*

6. High resolution LiDAR specifically for archaeology: are we fully exploiting this valuable resource?
*Robert Shaw*

7. Archaeological applications of multi/hyper-spectral data – challenges and potential
*Anthony Beck*

8. Making the most of Airborne Remote Sensing Techniques for Archaeological Survey and Interpretation
*Rebecca Bennett, Kate Welham, Ross A Hill and Andrew Ford*

9. 3D recording for cultural heritage
*Fabio Remondino*

10. Through an imperfect filter: geophysical techniques and the management of archaeological heritage
*Chris Gaffney and Vince Gaffney*

11. Marine geophysics: integrated approaches to sensing the seabed
*Antony Firth*

### Exploring the archaeological resource base

12. The English Heritage National Mapping Programme
*Pete Horne*

13. Integrating survey data – the Polish AZP and beyond
*Wlodek Raczkowski*
As far as the laser can reach…: Laminar analysis of LiDAR detected structures as a powerful instrument for archaeological heritage management in Baden-Württemberg, Germany

Jörg Bofinger and Ralf Hesse

Between the Lines – enhancing methodologies for the exploration of extensive, inundated palaeolandscapes

Simon Fitch, Vincent Gaffney, Benjamin Gearey and Eleanor Ramsey

The Aerial Reconnaissance Archives – a shared European resource

Lesley Ferguson

Using remote sensed data: interpretation and understanding

Approaches to the integrated study of archaeological sites, architectural monuments and historical urban units in the Czech Republic

Martin Gojda

Airborne Laser Scanning for the management of archeological sites in Lorraine (France)

Murielle Georges-Leroy

Aerial archaeological survey of a buried landscape: The Tókőz project, Hungary

Zoltán Czajlik, László Rupnik, Máté Losonczi and Lőrinc Timár

The archaeological landscape of northeast Iceland: a ghost of a Viking Age society

Árni Einarsson and Oscar Aldred

Reserved optimism: preventive archaeology and management of cultural heritage in Slovenia

Gašper Rutar and Matija Črešnar

World War I Heritage in Belgium: combining historical aerial photography and EMI

Birger Stichelbaut, Timothy Saey, Fun Meeuws, Jean Bourgeois and Marc Van Meirvenne

An aerial view of the past – aerial archaeology in Denmark

Lis Helles Olesen

Interpretation and map making

Rog Palmer

Training and development: the next phase?
